ABOUT THE AUTHOR

Michael Meyers is the industry's leading authority on Network+ Certification. He is the president and founder of Total Seminars, LLC, a major provider of PC and Network repair seminars for thousands of organizations throughout the world, and a member of CompTIA.

Mike has written numerous popular textbooks, including the best-selling the A+® *Certification All-in-One Exam Guide* and *Introduction to PC Hardware and Troubleshooting*, part of the "Mike Meyers' Computer Skills" series.

CONTENTS AT A GLANCE

Chapter 1	Introduction	I
Part I	Everything You Ever Really Wanted to Know About Networking	11
Chapter 2	Defining Networking	13
Chapter 3	Building a Network with OSI	31
Part II	The Basic LAN	69
Chapter 4	Hardware Concepts	71
Chapter 5	Ethernet Basics	89
Chapter 6	Modern Ethernet	121
Chapter 7	Non-Ethernet Networks	151
Chapter 8	Installing a Physical Network	167
Chapter 9	Wireless Networking	219
Chapter 10	Protocols	259
Chapter 11	TCP/IP	299
Chapter 12	Network Operating Systems	339
Part III	Beyond the Basic LAN	389
Chapter 13	Sharing Resources	391
Chapter 14	Going Large with TCP/IP	433
Chapter 15	TCP/IP and the Internet	465
Chapter 16	Remote Connectivity	499
Chapter 17	Protecting Your Network	547
Chapter 18	Interconnecting Network Operating Systems	583
Chapter 19	The Perfect Server	607
Chapter 20	Zen and the Art of Network Support	639

Network+ Certification All-in-One Exam Guide

Chapter 3	Building a Network with OSI	31
	Historical/Conceptual	32
	Welcome to MHTechEd!	32
	Test Specific	34
	Let's Get Physical	34
	The NIC	36
	The Two Aspects of NICs	44
	Beyond the Single Wire—Network Software	44
	There's Frames in Them Thar Frames!	47
	Assembly and Disassembly	50
	Talking on a Network	51
	Standardized Formats	51
	Network Applications	54
	How Dana Gets Her Document	55
	The OSI Seven-Layer Model	60
	Biography of a Model	60
	The Seven Layers	61
	Chapter Review	65
	Questions	65
	Answers	67
Part II	The Basic LAN	69
Chapter 4	Hardware Concepts	71
	Historical/Conceptual	72
	Topology	72
	Test Specific	73
	Hybrid Topologies	73
	Cabling	76
	Coax	77
	Twisted Pair	80
	Fiber-Optic	82
	Networking Industry Standards—IEEE	84
	Chapter Review	86
	Questions	86
	Answers	88
Chapter 5	Ethernet Basics	89
	Historical/Conceptual	89
	How Ethernet Works	90
	Physical Bus	91
	Organizing the Data: Ethernet Frames	91

Test Specific	94
CSMA/CD	94
Termination	97
Cable Breaks	99
Ethernet Cabling Systems	100
10Base5	101
10Base2	104
Extending the Network: Repeaters and Bridges	109
Repeaters	109
Bridges	113
Chapter Review	117
Answers	119
Chapter 6 Modern Ethernet	121
Historical/Conceptual	121
Test Specific	122
10BaseT	122
10BaseT Topology	122
UTP	125
10BaseT Limits and Specifications	128
10BaseFL	129
Connecting Ethernet Segments	130
How Big Can an Ethernet Network Be? The 5-4-3 Rule	133
A Useful Approximation	134
High-Speed Ethernet	137
100Base Ethernet	137
Gigabit Ethernet	138
10-Gigabit Ethernet	140
Switched Ethernet	143
Full-Duplex Ethernet	145
Conclusion	146
Chapter Review	147
Questions	147
Answers	148
Chapter 7 Non-Ethernet Networks	151
Historical/Conceptual	151
Token Ring	151
Test Specific	152
Logical Ring Topology	152
Physical Star	155
Token Ring vs. Ethernet	159

ACKNOWLEDGMENTS

I'd like to acknowledge the many people who contributed their talents to make this book possible:

To Nancy Maragioglio and Tim Green, my sponsoring editors at McGraw-Hill: First billing goes to you, amigos! Thanks for the encouragement, cudgeling, and general derring-do that helped get this book off the ground.

To my in-house Editor-in-Chief, Scott Jernigan: Pamplona! Pamplona!

To Martin Acuña, wireless guru and Mr. MCSE: As always, your words and gentle (or not so gentle) suggestions made this a much better book. Thanks!

To Cindy Clayton, editor extraordinaire: You "needn't" worry about all those strange words!

To David Biggs, our marvelous in-house artist: Simply a bang-up job, Don Aeron!

To Brian Schwarz: First and ten, we did it again!

To Jenn Tust and Jessica Wilson: An outstanding job coordinating the production of this book. Simply a great joy to work with you!

To their crew at MHO on the Left Coast (Kathleen Edwards, Elizabeth Jang, Melinda Lytle, Kelly Stanton-Scott, John Patrus, Dick Schwartz, Marcia Baker, Susie Elkind, Paul Medoff, Linda Medoff, Jack Lewis, Mark Karmendy, Peter Hancik, Julie Smith, Jean Bodeaux): Thanks for the excellent work you did, copyediting, proofing, illustrating, indexing, typesetting...

CompTIA

The logo of the CompTIA Authorized Curriculum Program and the status of this or other training material as "Authorized" under the CompTIA Authorized Curriculum Program signifies that, in CompTIA's opinion, such training material covers the content of the CompTIA's related certification exam. CompTIA has not reviewed or approved the accuracy of the contents of this training material and specifically disclaims any warranties of merchantability or fitness for a particular purpose. CompTIA makes no guarantee concerning the success of persons using any such "Authorized" or other training material to prepare for any CompTIA certification exam.

The contents of this training material cover the new 2005 CompTIA Network+ exam objectives.

How to Become CompTIA Certified

This training material can help you prepare for and pass a related CompTIA certification exam or exams. To achieve CompTIA certification, you must register for and pass a CompTIA certification exam or exams.

To become CompTIA certified, you must do the following:

1. Select a certification exam provider. For more information, please visit www.comptia.org/certification/itprofessionals/get_certified.aspx.
2. Register for and schedule a time to take the CompTIA certification exam(s) at a convenient location.
3. Read and sign the Candidate Agreement, which will be presented at the time of the exam(s). The text of the Candidate Agreement can be found at www.comptia.org/certification/general_information/candidate_agreement.asp.
4. Take and pass the CompTIA certification exam(s).

For more information about CompTIA's certifications, such as their industry acceptance, benefits, or program news, please visit www.comptia.org/certification.

CompTIA is a nonprofit IT trade association. CompTIA's certifications are designed by subject matter experts from across the IT industry. Each CompTIA certification is vendor-neutral, covers multiple technologies, and requires demonstration of skills and knowledge widely sought after by the IT industry.

To contact CompTIA with any questions or comments:
